

A low-angle, dynamic shot of two business professionals in dark suits running up a wide staircase. The camera is positioned behind them, capturing their movement from a low perspective. The building's facade is made of light-colored tiles with dark horizontal bands. A white handrail runs along the right side of the stairs. The scene is brightly lit, suggesting an outdoor or well-lit indoor environment. The overall mood is one of urgency and forward momentum.

TUM

Munich Dual Career Office

Munich Dual Career Office

The Munich Dual Career Office assists spouses/partners of top-level scientists, who are faced with various mobility needs. By means of a differentiated network of research institutions and industry along with institutes of education and social affairs, we provide assistance in mobility decisions through the development of individual solutions for dual career challenges.

The Munich Dual Career Office is a service of Technische Universität München in collaboration with:

- Max-Planck-Society (founding member), Helmholtz Zentrum München, German Aerospace Center (DLR) and Fraunhofer-Gesellschaft
- SÜD-CHEMIE AG, Infineon Technologies AG
- University of Applied Sciences – Munich and Katholische Stiftungsfachhochschule München

We assist by identifying career opportunities, providing information and giving advice.

Establishment of connections, development of strategies to look for career opportunities, support in job application procedures.

We encourage the integration of top-level scientists in Munich.

Support in relocation issues, answers to day care questions, schools, education, opportunities for recreational, cultural and social engagements, answers to transportation questions, access to further education in Munich.

We facilitate further education, establish contacts and discussions on dual career issues.

Introduction to dual career networks, invitations to events relating to dual career concerns, pairing with mentors, communities, ...

Co-operation partners:

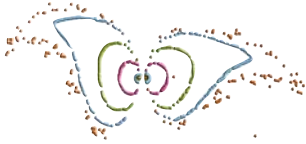

HelmholtzZentrum münchen
Deutsches Forschungszentrum für Gesundheit und Umwelt

Fraunhofer Gesellschaft

SÜD-CHEMIE
CREATING PERFORMANCE TECHNOLOGY
