

# Impressions Innovation, Technology and Society in Germany 2009/2010

Dounya Barrit (AUI, Morocco) (2009):

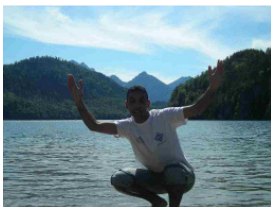

I think that being a participant of the Summer University program is the best experience I can ever have. I could enjoy Munich's history, culture, technology and modernity. I did enjoy Bavarian food and learning German language. I was also glad to meet the other course participants and have new friends from different background, cultures and countries.

Astrini (NTU, Singapore) (2009):

Having spent 3 wonderful weeks in the TUM Summer University is truly a priceless experience for me. In the programme, I did not only have the chance to improve my German language, but also immerse myself into the German culture and experiencing the social life in Germany. I truly enjoyed the activities offered, from the enriching workshops in research institutes and production factories, to the fun and relaxing tours around the cities and places of attractions. I am glad to be one of the members of the Summer University, and I will take with me all the unforgettable lifelong memories and experiences.

Mourad Ghanem (AUI, Morocco) (2009):

Innovation is the best summer program that I have been taken part in so far. It helps me to interact with international students. I gained a lot of knowledge from those students. The program gave me an idea about my future work as a computer science student. The summer program of Innovation, Technology and Society in Germany seems to be a small world in which we studied with students from seven different countries and cultures and religions. This is a good experience for me because it will help me in my future when I will study abroad.

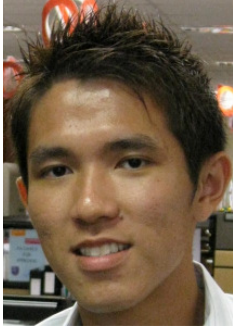

Francisco Antonio Hernandez Mat3nez (Universidad Regiomontana, Mexico) (2010):

I think this is the best way to know Germany, not only because of the great organization during the whole course, but because of the people in the group, the different cultures, countries and all my new friends, made me to have a great memory of M3nchen, to come back soon.

# Impressions Innovation, Technology and Society in Germany 2009/2010

Tan Shao Wei, (NTU, Singapore) (2010):

I had wonderful and fulfilling 3 weeks spent in the Summer University at TUM. Within the 3 weeks, I managed to learn basic German language and have also developed an interest to pick up more advanced German in the future. The tutors and staff at TUM were also very patient and helpful to all our needs. Last but not least, it was a great experience to meet up with students from different continents, and I would definitely recommend my Juniors to choose TUM's Summer University if they have the opportunity!
